OPTICS AND LASER TECHNOLOGY

INDEX TO VOLUME 15

Articles

(TN = technical note)

1 A cw CO_2 laser rangefinder using heterodyne detection and on-off amplitude modulation *R.J.L. Lerou* 153

2 A fast electro-optic focusing device *S. Sullivan* 249

3 A long-pulse xenon ion laser as a pumping source for dye lasers *G. Bergamasco, W. Cecchetti, R. Polloni* 191

4 A novel laser scanning camera *M. Jagger, A.J.M. Lichnowski, R.S. Adrain, I.A. Armour* 77

5 A real-time method for monitoring the three-dimensional extent of high power cw laser beams *I.W. Boyd* 150

6 A simplified, miniature TEA-CO_2 laser using a semiconductive pre-ionization technique *P. Pace, M. Hale, J. Cruickshank* 189

7 A system combining several interferometers to investigate spatial gas-dynamic phenomena and high-speed photography of axisymmetric processes *P.I. Kovalev, V.,A. Komissaruk, N.P. Mende* 141

8 A two-dimensional diffraction pattern sampling system for determining the optimum parameters of a matched spatial filter *S. Jutamulia, H. Fujii, T. Asakura* 101

9 Application of information theory to the design of line-scan and sensor-array imaging systems *F.O. Huck, C.L. Fales, S.K. Park, D.E. Speray, M.O. Self* 21

10 Computer-generated line holograms using an *x y* plotter *K. Nagashima, T. Asakura* 133

11 Construction of a two-dimensional colour hologram using a source encoding technique, *F.T.S. Yu, G. Gheen, N. Wang* 257

12 Continuously coupled unstable resonators: problem of large output beam divergence (TN) *E.K. Gorton* 274

13 Design of a new thin-film electro-optic switch *P.S. Chung, K.S. Chiang* 83

14 Differential thickness measurement using a polarization interferometer *V.T. Chitnis, Y. Uchida, K. Matsuura, S. Hattori* 269

15 Energy loss from internal reflection off metal layers on glass *M.W. McDowell, D.F. Bezuidenhout, H.W. Klee, E. Theron* 303

16 Evaluation of spectral line profile from relative widths of Fabry-Perot interferograms *M. Platiša, R. Konjević, S. Bukvic* 209

17 Feasibility of finding malignant diseases with the Ar^+ 501.7 nm laser line using a new blood-analysis method *H. Sato, H. Hayashi, T. Totsuka, M. Sugiyama, S. Tsuchiya, K. Takeuchi, N. Mochida* 321

18 Investigation of an axisymmetric gasdynamic object by means of several shear interferometers *V.A. Komissaruk, N.P. Mende* 47

19 Laser heating: an analytical approach to the theory *D.J. Gibbons* 95

20 Laser speckle velocimeter using a pair of virtually shifting photodiodes *F. Francini* 307

21 Location and estimation of the defective area in a diaphragm: an *a posteriori* moiré method *C. Shakher, A.K. Aggarwal* 206

22 Measurement of the size and position of aerosol droplets using holography *W. Grabowski* 199

23 Micro-optical 3-dB mode converters *P.S. Chung* 263

24 Multiple beams from Rogowski-profile solid electrode TEA CO_2 lasers *S.A. Hamadto* 105

25 New strain standards for glassware stress photoelastic evaluation *T. Kishii* 253

26 Optical inspection by internal reflection and spatial filtering *P. Cielo* 145

27 Performance of active and passive night viewing systems under low ambient illumination levels *J.C. Monga, B.D. Bhawe* 259

28 Preliminary results on underwater holography (TN) *J. Watson, P.W. Britton* 215

29 Producing and testing of binary amplitude gratings using self-imaging and double exposure techniques *K. Patorski, P. Szwaykowski* 316

30 Separation of 3-D displacement components in the

white light speckle method *A. Asundi, F.P. Chiang* 41

31 The use of a fibre-optic reference beam in a focused image holographic interferometer *D.M. Rowley* 194

32 The use of commercial fine-grain films for computer-generated holograms *M.J. Yzuel, R. Navarro, J. Campos, F. Calvo* 138

33 Transmission properties of cabled multimode fibres *A. Basigli, G. Cancellieri, P. Fantini* 311

34 Ultrashort pulses from semiconductor diode lasers *B.K. Garside, R.E. Park* 91

35 Ultra-violet laser doping of silicon *K.G. Ibbs, M.L. Lloyd* 35
